
NYLON CORD GRIP, 1/2" NPT STRAIGHT, .187-.250 OD RANGE

CGN50187 | [Pass & Seymour](#)

FEATURES & BENEFITS

Non-Metallic Cord Connectors are constructed of a durable, nylon material which offers excellent corrosion resistance, is lightweight, durable and ideal for use in damp environments. Nylon Cord Connectors are ideally suited for use in applications with moisture or washdowns and they provide an environmental seal against dirt, coolants, as well as other chemicals.

- Heavy duty Nylon body is resistant to impact and corrosion
- Rubber grommet provides a liquid-tight seal and reduces cord pull-out while resisting chemicals
- Available in straight, 90°, and underground feed styles
- Color coded grommets make for easy identification and ease of installation
- Rugged construction suitable for various industrial applications such as MRO, food processing, water/waste water, marine, pulp & paper, and petrochemical

SPECIFICATIONS
