

From the innovator of the product category, comes a full range of Pass & Seymour GFCI receptacles to enhance safety, shorten installation times and increase productivity on the jobsite. With high-impact-resistant, thermoplastic construction, our spec-grade GFCI are the most durable GFCI available.

## Features & Benefits

SafeLock: Protection: if critical components are damaged and ground fault protection is lost, power to receptacle is disconnected.

Exceeds UL943 voltage surge requirements: survives 100x the required UL 3kA/6kV voltage surge test cycles.

Trip indicator light (red LED).

Two back wire holes per terminal.

1/4" thinner than competitors: GFCIs: leaves more room for wires in the box.

High-impact-resistant thermoplastic construction.

Button colors match the device face.

Class A rated GFCI.

Tri-drive screws.

10kA short circuit rating.

Prevents line-load reversal miswire: no power to the face or downstream receptacles if wired incorrectly.

FSUL Listed (Federal Specification WC596).

Side or internal screw-pressure-plate back wire with #10 : #14 AWG solid or stranded copper wire.

Ground screw has a back wire clamp for easy installation.

Mounting screws are shipped captive in the device and wall plate for easier installation.

Extra-long strap.

Dual-direction test and reset buttons.

Supplied with matching TP26 nylon wall plate.

GFCIs with Auto-Ground assure a positive ground to metal box.

For covering patents, see [www.legrand.us/patents](http://www.legrand.us/patents).
