

Stock #: IBTS-50

Product Description:

1/2" split threaded plastic insulating bushings are used on 1/2" threaded rigid or IMC conduits when existing wires have already been pulled and an insulating bushing on the pipe is required. Garvin Industries' split threaded insulating bushing design easily wraps around conduits and screws on ensuring a secure and tight fit. They can even be used with PVC cement to ensure plastic remains glued together.

Product Specifications:

Material : Plastic

Size : 1/2"

Compliance :
