

Stock #: LTC-20045

Product Description:

2" insulated 45 degree connectors are used on 2" flexible metallic liquid tight conduits and Type B flexible non metallic liquid tight conduits to positively bond conduits to boxes or enclosures in both wet and damp locations. Garvin Industries' 45 degree connectors are designed to slip on to the conduit quickly and to grip the conduit jacket, speeding up installation while ensuring a strong, liquid tight seal that decreases the risk of pullouts. Garvin Industries' malleable iron castings match with other components perfectly without strain or distortion. All components of these connectors can be easily disassembled and reused. Additionally, the included sealing washers provide liquid tight seals when connectors are terminated in threadless openings. The heavy duty locknuts included with every Garvin liquid tight connector ensures the continuity of the grounding. Connectors are zinc electroplated for excellent corrosion protection in damp locations.
