

Stock #: MOLB-100

Product Description:

1" mogul conduit bodies are attached to 1" threaded rigid conduits when a change of direction in the conduit run requires wires to be pulled and fed through in a new direction. Their removable cover makes general maintenance and wire pulling and feed through easy and convenient. Commonly used for electrical service entrance wires or as an economical convenience box when extra wire capacity is needed. Their extra wire capacity and angled body allow installer to easily bend wires into the smooth turns. Powder coated finish and water-tight gasket ensure a weatherproof installation.

Product Specifications:

Special 2 Hour Fire Rating
