

Stock #: SLB75

Product Description:

3/4" LB style service entrance conduit bodies are attached to 3/4" threaded rigid or IMC pipes in opposite directions. Their removable cover makes general maintenance and wire pulling and feed through easy and convenient. Commonly used for electrical service entrance wires or as an economical convenience box when extra wire capacity is needed. Their extra wire capacity and angled body allow installer to easily bend wires into the smooth turns. They have a powder-coated finish and a water-tight gasket to ensure a weatherproof installation.

Product Specifications:

Cu. In. :	3.8
Material :	Die-cast Aluminum with Powder-coated Finish
Size :	3/4"
Compliance :
