

STI FIRE SERIES STOPPER® STATION

SS-2002F

PRODUCT OVERVIEW

This STI Stopper Station with a patented design is a highly advanced push button unit that is ADA Compliant and UL Listed to U.S. and Canadian safety standards. Model SS-2002F is designed specifically to complement fire alarm systems of the 21st century. Operation includes Push-to-Activate and Key-to-Reset. The unit incorporates quality features throughout, including raised lettering molded into its polycarbonate housing.

If you wish, you can protect your fire Stopper Station with a tough STI cover to help stop vandalism or accidental damage. The Universal Stopper® cover can be ordered with an optional pre-alarm to help stop malicious activation for inside applications. Outside applications require an STI UL Listed outdoor rated cover to be mounted over the Stopper Station button to maintain UL Approval.

KEY FEATURES

General Information

- Push button switches designed specifically to complement fire alarms systems of the 21st century.
- Simple Push-to-Activate and Key-to-Reset operation.
- Three year guarantee against breakage of polycarbonate in normal use (one year on electro mechanical and electronic components).

Design

- Patented design helps stop accidental activation.
- Raised letters and symbols molded into housing.

Construction

- Super tough housing.
- ADA Compliant and UL Listed to U.S. and Canadian safety standards for indoor use.
- Stainless steel backplate with ground lug.

Installation

- Polycarbonate complies with FDA regulations for food contact applications.
- Typical working properties of polycarbonate are -40° to 250°F (-40° to 121°C).
- When using an STI Stopper Station outdoors, UL requires unit to be protected with an STI UL Listed Weather Stopper®.

Electronics

- Two Form "C" contacts rated 125/250 VAC, 10A, 1/2 HP, 30 VDC, 6A.

Options

- Add a tough STI cover to protect against vandalism, accidental damage or weather.
- Cover available for indoor use, with a built-in alarm to help stop malicious activation.
