

Marked “Controlled” Receptacles

To comply with 2014 NEC Article 406.3(E), CA Title 24 & ASHRAE Energy Efficiency Standard 90.1

To meet the requirements for identifying receptacles that will be automatically de-energized as part of an overall plug load control program, the 2014 National Electrical Code requires all 15A & 20A, 125V receptacles that are automatically controlled to be marked with a specific symbol .

Leviton offers two solutions to help comply with the new marking regulations:

Wallplate Decals

For the most economical retrofit application, these decals allow you to mark existing receptacle wallplates with the required symbol, and the word “CONTROLLED” (optional) for easy identification. Decals use a UL approved material for marking and labeling. 70 decals of each/pk.

Cat No: CRLAB

Imprinted Receptacles

For new construction and renovation applications, custom imprinting directly on the receptacle is available for our most popular specification grade receptacles, both back and side wired and side wired standard, tamper-resistant and Decora® platforms
