Installation Instructions

IMPORTANT: A 22 Inch Clearance Must Be Allowed For Removal Of The Media Cartridge From The Cabinet.

1. Turn off electricity to furnace.
2. Remove front cover.
3. Slide media cartridge from air cleaner cabinet, and discard packing material.
4. Remove and discard existing furnace air filter.
5. Install cabinet in return air system.
6. Properly install airflow direction arrows on interior of cabinet. Duct supports are recommended to support weight of cabinet. See typical installations.
7. Slide the media cartridge into the cabinet. Be sure the airflow arrow on the cartridge is in the same direction as the arrow in the cabinet. The wire mesh is always on the downstream side of the filter media. Replace cover.
8. If a condition indicator is to be used, install on a vertical duct surface between the air cleaner and the furnace blower.
9. Turn on electricity and furnace and check performance of all equipment.

Maintenance

The air cleaner media will normally need to be replaced every 4 to 6 months (end of the heating or cooling season) with normal usage. If an air cleaner condition indicator is used, change the media when the device indicates that service is required. Additionally, the frequency of filter replacement can be determined by visual examination.
