

FRIGIDAIRE

Comfort SYSTEMS

Indoor Coils Cased, Uncased & Horizontal

QUALITY, DEPENDABILITY, ENERGY EFFICIENCY AND *Comfort*

These are things you expect from a Frigidaire product, and they are exactly what you will get with our indoor coils.

When you purchase a new heat pump or air conditioner you should always replace the coil. **Here's why:** An old, dirty, coil designed for a less efficient product will prevent your outdoor unit from performing at optimum efficiency, and may even damage your new air conditioner or heat pump compressor. Also, a coil designed for a different brand has not been matched or tested with your new system, so efficiency ratings and performance can also be affected.

It's important to us that homeowners understand the correct Frigidaire components it takes to make the most efficient and dependable comfort system for your family. After all, we design comfort to fit your life.

Frigidaire fits your life.

▲ **Uncased indoor coil.**

This coil is used for upflow and downflow applications. The coil is encased by the ductwork during installation.

▲ **Cased coil.**

The furnace pictured to the right demonstrates this coil. It is installed on top of the furnace.

▲ **Advanced technology.**

Made of all aluminum to resist corrosion.

▲ **Horizontal coil.**

Cased coils are also available in horizontal applications.

▲ **Aesthetically pleasing and designed for easy care.**

Smooth and practical lines make your Frigidaire indoor coils eye appealing. All Frigidaire cased coils receive a high-quality gloss finish for increased durability and corrosion resistance.

▲ **Built to last.**

Energy-saving operation and years of trouble-free, reliable service are built into every Frigidaire product.

Exceptional 10-Year Warranty and Comfort Quality Pledge.

We offer a 10-year limited parts warranty on the indoor coil when installed with a complete registered system. Our Comfort Quality Pledge guarantees we will replace your Frigidaire air conditioner or heat pump if the compressor fails in the first 10 years of ownership, registration required. This pledge and all compressor warranties require the outdoor unit to be installed with a matched indoor coil at the same time, like the ones shown in this brochure.

For more information on Frigidaire warranties, ask your Frigidaire contractor or visit us at frigidairehvac.com.
