

Understanding Bleeding Control Kit Tools Can Save a Life

Bleeding Control

Bleeding Control kits come with a number of life saving tools to help a bystander control a traumatic bleeding event until professional help arrives.

First Aid Tape						•

Two dots equals a quantity of two.

Windlass Tourniquet
Global Industrial 290461
A tourniquet is used to stop severe bleeding on an arm or leg when direct pressure alone does not. A tourniquet is wrapped around the limb above the wound and tightened to restrict blood flow. Some tourniquets like the First Aid Only QuickTight Tourniquet have a built-in windlass wand that is twisted to cut off blood flow quickly and then clipped into a clasp.

Vented Chest Seal
A chest seal covers a lung puncture wound and allows the lung to continue to function. Vented chest seals have channels to allow excess air trapped in the chest cavity to vent out while also preventing air from the outside from being sucked into the chest cavity. The chest seal is coated with a thick gel to adhere to a victim's chest without interference from hair or moisture.

Hemostatic Gauze Pad
A hemostatic gauze pad is ideal to stop bleeding on areas of the body where you cannot apply a tourniquet like the torso, groin or neck. The pad is designed to promote rapid blood coagulation on an extreme bleeding wound. The pad is treated with an agent that absorbs the water in blood allowing the clotting factors to form a clot over the wound quickly.

Israeli Bandage
The Israeli bandage is a combination primary dressing and pressure applicator for bleeding wounds. It has a sterile non-adherent pad attached on a sturdy but stretchable 4" wide fabric wrap with a built-in pressure applicator bar. As the wrap is fed through the pressure applicator bar and pulled tight, the bar puts direct pressure on the wound restricting blood flow.

- Most Kits Come With a Few Standard Items:**
- Nitrile gloves to both protect the bystander and to help keep the wound from becoming infected
 - Gauze can be used to both absorb blood and put pressure on the wound
 - Shears to cut gauze or cut away clothing
 - A marker to note the time a tourniquet was applied on a limb wound

20% of people who die from traumatic bleeding injuries could have survived if a skilled bystander stopped the bleeding.*

Bleeding Control

Respond Quickly to a Multiple Victim Bleeding Event

The bleeding control throw bag is made to allow distribution of bleeding control kits quickly in a crisis. The portable bag allows you to reach multiple bleeding injuries when seconds count.

- Contains four premium bleed control kits to treat limb, torso and lung puncture wounds.
- Easy-to-carry bag to move quickly to assist multiple victims until professional help arrives.
- Ideal for public spaces, event venues, schools and universities, airports, large manufacturing facilities.

The four Bleeding Control kits easily fit within the Throw Bag.

Fabric Throw Bag
Part No. B3127053

Bleeding Control

Be Prepared for the Unexpected Bleeding Emergency

Introducing new wall-mountable bleeding control kits for traumatic bleeding events until professional help arrives.

- Bright red case mounts to the wall in a highly visible location.
- Ideal for manufacturing facilities, hospitality sites, offices and schools.

Kit Contents

- Windlass Tourniquet
- Elastic Band Back-Up Tourniquet
- Hemostatic Blood-Clotting Gauze Pad
- Chest Seals
- Israeli Bandage
- Hema-Seal Trauma Dressing
- Emergency Blanket
- Trauma Pad
- Nitrile Exam Gloves
- Bandage Shears to Cut Clothing
- Marker to note Tourniquet Time
- Bleeding Control Product Use Guidelines
- Wall Mounting Kit

Kit Contents

Fabric Throw Bag contains four individual Enhanced Pro (B2385021) Bleeding Control kits. Each Bleeding Control Kit contains the following items:

- Windlass Tourniquet 1
- Back-up Elastic Tourniquet 1
- Hemostatic Blood-Clotting Gauze Pad, 4" x 4" 1
- Vented Chest Seals 2
- Israeli Bandage 1
- Aluminized Rescue/Shock Blanket 1
- Trauma Pad Dressing, 5" x 9" 1
- Protective Nitrile Exam Gloves 4
- Bandage Shears 1
- Marker to note tourniquet time 1
- Bleeding Control Product Usage Guideline 1

Shelter in Place Preparedness

Uniquely designed for up to twenty persons during a potentially dangerous situation outside with essentials to keep your group safe.

Shelter in Place Preparedness
Part No. B3127052

Kit Contents

- Metal Door Jammer (Prevents Entrance) 1
- Emergency Crank Flashlight/ Radio/Phone Charger 1
- Emergency Water Packets, 4oz 20
- Emergency Whistle 1
- Rescue Blankets 3
- Dotted Poly-Cotton Gloves 2
- Rain Ponchos 3
- Tissue Packets 3
- Duct Tape Roll, 2" x 10ft 1
- Face Masks 4
- Aspirin Tablets 10
- Ibuprofen Tablets 10
- Deck of Playing Cards 1
- First Aid Guide 1
- Windlass Tourniquet 1
- Banded Back-up Tourniquet 1
- Hemostatic Blood-Clotting Gauze Pad 1
- Hema-Seal® Trauma Dressing 1
- Trauma Pads 2
- Protective Nitrile Gloves 2
- Sterile Gauze Pads, 3" x 3" 2
- First Aid Tape Roll 1
- Fabric Bandages, 1" x 3" 30
- Plastic Bandages, ¾" x 3" 30
- Antibiotic Ointment Packets 25
- Alcohol Wipes 32
- BZK Towelettes 9
- Hand Sanitizers 5
- Conforming Gauze Roll, 2" x 4yds 1
- Sterile Gauze Pads, 3" x 3" 2
- Trauma Pad 1
- Protective Nitrile Gloves 2
