

SSCEP SERIES-304 STAINLESS STEEL COLD EXPANSION PEX (CEP) FITTINGS

Stainless steel cold expansion PEX fittings are resistant to chemicals in corrosive and aggressive water conditions. 304SS is not susceptible to dezincification, unlike brass. SSCEP fittings are designed for use in ASTM F1960 PEX cold and hot water distribution systems using SDR9 PEX tubing. A large internal diameter provides maximum flow through the fitting. There is an integral raise or stop tab on the fittings to ensure proper installation of the tubing. The expansion connection method provides a positive and leak free seal.

SPECIFICATIONS:

- For use with ASTM F2769 (PE-RT) or SDR9 pipe
- For use with ASTM F876 or F3253 PEX pipe
- Cold expansion PEX end conforms to ASTM F1960
- ASTM F1960 CEP fittings have larger inside diameter than ASTM F2159 poly cold expansion type PEX fittings and ASTM F1807 metal cold expansion type PEX fittings, providing maximum water flow
- Cold expansion connection method provides a positive and leak free seal
- Threads conform to ASME B1.20.1
- Working Pressure Rating: 100 PSI
- Temperature Range: Up to 180 °F (82 °C)
- Made of 304 Stainless Steel
- Historically compatible only with PEX-A PEX pipe. Some manufacturer's are stating their PEX-B PEX pipe is compatible with cold expansion fittings. It is the sole responsibility of the installer to confirm the piping is suitable for CEP applications.

CERTIFICATION:

- cUPC Standard ASTM F1960 & CSA B137.5
- NSF/ANSI Standard 61 & 372 Certified (Stainless steel alloys do not contain any lead, 0.00% Pb)

STAINLESS STEEL COLD EXPANSION PEX FITTINGS

Transition Coupling - Cold Expansion PEX x PB

Transitions from polybutylene (PB) pipe PB2110 to cold expansion PEX. Kit includes one coupling, one cold expansion collar, and one copper ring. Copper ring goes to the PB end and expansion collar goes to the CEP end.

Part No.	Nominal Pipe Size		L		W
