

To whom it may concern:

762117 – Dark Green spring is an alternative spring that can be used in the B42 regulator. This spring was originally designed for the B31 regulator but has been used in many applications for the B42. The spring range for the Dark Green spring in the B42 is 6-16 iwc. The Dark green that is listed in the B42 literature is a different spring with the same color but supplies 4-9 iwc spring range.
