Custom Metal Wall Plates Engraving & Pad Printing

Custom Engraving & Pad Printing

Most plates in this catalog can be engraved or pad printed. However, engraving plated finish metal plates is not recommended, since exposed edges could oxidize over time. Refer to current price sheet to select the better process that suits your needs.

Position

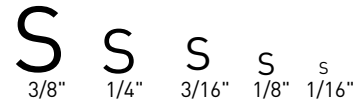

Marking may appear anywhere on the flat surface of smooth plates. On decorator-style plates, markings are restricted to the top and bottom flat panels. If space permits, up to three lines can be pad printed on a plate provided the lettering fits within a 50mm circle.

Letter Height

Unless specified otherwise, designers will select size and position of letters or markings for maximum legibility. Characters per inch:

3/8" - 2-1/2 1/4" - 4 3/16" - 6 1/8" - 9 1/16" - 14

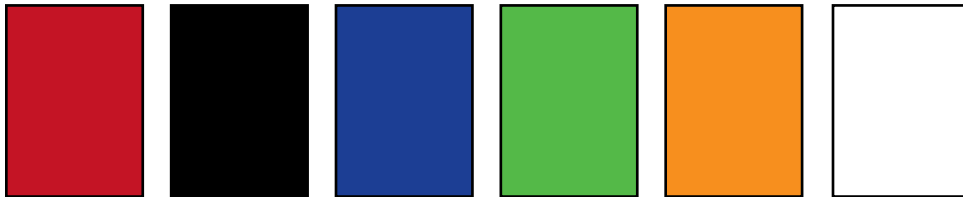

Letter Font

Pad printing is available in any True Type font in colors listed below, on 1 gang and 2 gang plates. Bitmap images can also be printed. Laser engraving is available in any True Type font only in black (not color-filled) including bitmap images. Engraving with color fill is available only in block letter font. While mixing of laser and color-filled engraving is allowed, it is not recommended since the font types will not match.

Color

Color-filled engraving can be filled with red, orange, black, blue, or white paint. Standard colors for pad printing are red, black, blue, green, orange or white, as shown below.

Red Black Blue Green Orange White
