

Siemens Low Voltage Residential Circuit Breakers Miniature Thermal Mag Circuit Breakers - Type QP/MP, 2-Pole, 120/240VAC are Circuit Protection Load Center Mains, Feeders, and Miniature Circuit Breakers. Type: MP-T Standard: HACR Rated Voltage Rating: 120/240 Amperage Rating: 50 Interrupt Rating: 10 Number Of Poles: 2 Operating Temperature: 40

| General technical data                        |            |
|-----------------------------------------------|------------|
| number of poles                               | 2          |
| Electricity                                   |            |
| continuous current rated value                | 50 A       |
| supply voltage frequency rated value 50/60 Hz | Yes        |
| Environmental conditions                      |            |
| ambient temperature during operation maximum  | 40 °C      |
| Model                                         |            |
| product brand name                            | SIEMENS    |
| Mechanical Design                             |            |
| design of the product                         | MP-T       |
| General product approval                      |            |
| standard                                      | HACR Rated |
