- Welded 20-gauge junction box to back wrap, easy rear access wiring panel.
- Rounded upper corners and junction box sides.
- Linear high-limit temperature control with automatic reset.
- High altitude version available (-HA) up to 8200 ft.

Heating element

- Stainless steel tubular heating element with aluminum fins.
- Floating stainless steel heating element on high-temperature nylon bushings reducing expansion noises.
- Aluminum diamond shape element fins position for maximized heat transfer.
- Element locked in place by screw on a stainless steel support.

Dimension

- See Table.
- Small height and slim depth for economy of space.
- Standard watt density and low watt density models.

Control

- A wide selection of built-in controls available.
- Built-in thermostat kit can be installed at either end.
- Built-in relay kit fits in the right end box only.
- A compartment for low voltage connections (located directly under the junction box) facilitates the installation of low voltage relay in electric baseboard.

Ouellet highly recommends using an electronic wall thermostat for greater comfort and efficiency.

Installation

- No disassembly installation with single-screw built-in rear entry wire holder.
- Installation directly on the floor with connection box at both ends of the heater.
- Two rows of oblong mounting holes with center mark for ease of installation.
- Raceway and side knock-outs for baseboard interconnections.

Warranty

- 5-year warranty against defects.
- Heating element has a lifetime warranty for the initial end user.

Note: Stainless steel tubular heating element on all sizes greatly reduces the potential for 60Hz hum. Locked-in-place element, mounting slot holes and overall construction maximizes performance, quality and more.

Application

- Residential and light commercial applications. Living areas, bedrooms, etc.
