

Miniature Timer Module

SA-026Q

The **ENFORCER**® SA-026Q is a low-voltage miniature delay timer module that operates on 12 to 24 volts AC or DC. This timer module will extend the activation time of a momentary contact switch for 1~180 seconds via a field-adjustable potentiometer. Use with electrical locks that do not have a built-in time delay function. Its compact size makes it small enough to fit in a single-gang box or inside a door frame cavity.

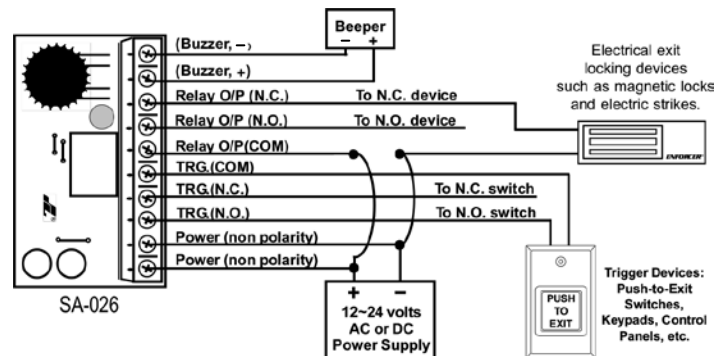

Actual Size:
 $1\frac{3}{16}'' \times 2\frac{9}{32}'' \times \frac{5}{8}''$

Features:

- Adjustable timer from 1~180 seconds via an onboard potentiometer
- NO/NC Switch trigger
- Compact design: $1\frac{3}{16}'' \times 2\frac{9}{32}'' \times \frac{5}{8}''$ (30x58x16 mm)
- 12~24 VAC/VDC Operation
- Current: 2mA (standby), 75mA (active)
- Relay output: Form C (SPDT) via terminal blocks
- Contacts rated 2A@24VDC
- Built-in buzzer output (100mA@24VDC)
- Includes double-sided foam tape

Sample Application:

For fail-safe electromagnetic locks
